SOLICITATION OF STUDENTS

Date: August 8, 2011

Solicitation of students for financial or material contributions, or for purchase of goods and/or services, on school property or at school-sponsored activities, by outside groups is not permitted except where the solicitation is an integral part of a properly approved contract or agreement.

Community-based flyers either for the purpose of solicitation or for the purpose of providing information must have prior approval by the Board of Education. Flyers will only be considered for approval on behalf of organizations or associations which are nonprofit, community-based and exist for the purpose of providing services for school children or their parents.

Once approved, flyers will be placed on the school system website.

Solicitations of information through surveys or other data gathering projects may be permitted where they have been reviewed and approved by the Superintendent's office as authorized by the Board.
