COURSE DESCRIPTION

Anatomy and Physiology is a vital part of most healthcare post-secondary education programs. The Essentials of Healthcare is a medical-focused anatomy course addressing the physiology of each body system, along with the investigation of common diseases, disorders and emerging diseases. The prevention of disease and the diagnosis and treatment that might be utilized are addressed, along with medical terminology related to each system. This course provides an opportunity to demonstrate technical skills that enforce the goal of helping students make connections between medical procedures and the pathophysiology of diseases and disorders. The prerequisite for this course is Introduction to Healthcare.

NOTE: You will receive two lines on your transcript: An Essentials of Healthcare credit and an Anatomy credit. The same score will be reported for both courses. The anatomy course will not be removed from the transcript.

Late Work: Late work is defined by the instructor as work assigned in class that the student fails to complete by the due date assigned.
